

## Lipetsk SEZ Tenants Product Catalog

## **Welcome to the Lipetsk Special Economic Zone!**

We are happy to present you with a new catalog of products from the Lipetsk SEZ tenants. It features high-tech items that are in demand by both corporate and individual consumers. With this catalog, you will learn more about the operations of the global top-notch production companies and build a detailed picture of what is manufactured in the Lipetsk SEZ. I am sure that this catalog will be clear, informative and useful to you.

*Alexander Bazaev  
General Director  
Lipetsk SEZ*

## FENZI

Fenzi manufactures high-quality primary and secondary sealants for double-paned windows, with its production sites located in Italy, Belgium, Canada, China, and Russia. The company is the world's top producer of polysulfide secondary sealants marketed to insulating glass manufacturers worldwide through an extensive sales network. Relying on many years of experience, the company improves its quality assurance system to reduce the percentage of defects and claims.

Product/ Application	Specifications
Polyester sealants for the glass industry	<ul style="list-style-type: none"> <li>• Two-component thiokol polysulfide sealants designed for the insulation of glass units</li> <li>• High, medium, and low viscosity sealants</li> <li>• Can be applied both manually and mechanically</li> <li>• High adhesion to glass, aluminum, stainless and galvanized steel</li> <li>• Best selling polysulfide sealant in the world</li> <li>• Maximum polymer concentration, no solvents, made of environmentally friendly materials</li> <li>• Compliance with the strictest certification requirements of CEKAL Institute (Paris)</li> <li>• Very low moisture vapor transmission rate (MVTR), excellent gas retention rate (GTR)</li> <li>• Higher permissible variation of mixing ratio in the extruder</li> <li>• 100% guarantee of high efficiency in the long term</li> </ul>

**Address:** Lipetsk Special Economic Zone  
Gryazi, Gryazi District, Lipetsk Region 399071

# Stile di Vita®

## Lipetsk Coffee Company

Lipetsk Coffee Company is a major producer of roasted coffee beans under the Stile di Vita brand. With its automated full-cycle production line and an innovative roast profile replication system, the company is capable of roasting over 70 tons of coffee beans per month. An in-house laboratory fitted out with the equipment from the world's top brands ensures that the quality of products meets the highest standards.

### Products

### Description

Roasted coffee beans

The company manufactures roasted coffee beans under multiple brands. The products are available in both brick-and-mortar and online shops. All the products are certified to European quality standards (ISO 22000:2005). Product quality is assured at every production stage thanks to an in-house quality control lab.

[sezlipetsk.ru](http://sezlipetsk.ru)

Bekaert is a global leader and the largest independent manufacturer of steel wire and cord products, offering high-tech coating and metal processing solutions. Bekaert's steel wire, mesh and innovative fibers are used extensively in the construction of roads, bridges, tunnels, mines, architecture and landscaping, prefab reinforced concrete, and industrial floors. Bekaert's speciality Dramix® steel fibers have proved their efficiency as a concrete reinforcement material.

Product	Specifications	Export destinations
Brass coated steel cord	Reinforcement of car and truck tires	Slovakia Czech Republic Serbia Finland Belarus Ukraine
Dramix® 3D/4D steel fiber	Reinforcement of concrete industrial floors (a better alternative to bars)	
0.15–1 mm brass coated steel wire	Reinforcement of high pressure hydraulic hoses and other rubber components	
Scrap brass coated steel wire and cord	Secondary use	
Spent 11% hydrochloric acid	Recycling and secondary use

## BS Processing

BS PROCESSING applies polymer and decorative coatings to galvanized rolled steel and other steel products. The company stands out in the market for highly qualified and seasoned personnel, a wide range of products, and an ability to deliver orders of any complexity.

Product / Application	Specifications
Printech-coated and painted rolled steel	<p>Printech polymer coating imitates natural construction and finishing materials:</p> <ul style="list-style-type: none"> <li>• Wooden surfaces</li> <li>• Brick walling</li> <li>• Natural stone</li> <li>• Tailor-made repeating patterns, e.g. khaki, shapes, logos</li> </ul>

**Address:** Lipetsk Industrial Special Economic Zone,  
Gryazi District, Lipetsk Region 399071

[sezlipetsk.ru](http://sezlipetsk.ru)

## Fondital

FONDITAL is the world's largest producer of aluminum radiators. The product range includes extruded and die-cast aluminum radiators, gas convectors, wall-hung and floor-standing boilers, solar collectors, pipes, and fittings. FONDITAL products meet the highest international standards.

Product / Application	Specifications	Export destinations
Central heating radiators	Calidor, Solar, Astor, Vision, and Alustal aluminum and bimetal radiators differing in design, heating capacity, and axle spacing	Armenia Belarus Kazakhstan
Gas water heaters for central heating systems	Designed specifically for the Russian market, the water heaters are compact, with all parts and components accessible from the front to ensure easy installation and maintenance. Minorca CTFS 24 is a 24 kW water heater that extends the line of 9, 11, 13, 15 and 18 kW boilers.

# Schlumberger

## REDALIT Schlumberger

REDALIT production facilities include a foundry (4,000 tons per annum) and a machining shop (4 million pieces per annum). With this production site commissioned, Schlumberger increased its share of locally sourced electric submersible pumps (ESP) by 35% to 100%. ESPs manufactured in Russia meet the world's highest quality standards.

Products	Description and application
High-performance radial and vortex impeller pumps	<p>Modular ESPs for lifting fluids from oil wells with the nominal capacity of 20 to 900 cu m per day</p> <p>The ESPs are specifically designed for efficient operation in wellbores with a high solids content. Our products combine proven Schlumberger solutions and strict Russian manufacturing standards.</p>
